Antistatic brush

(Product name)

VTBR1

(Product identification)

Manufactured / imported by:

VELLEMAN NV.

Legen Heirweg, 33

9890 Gavere

Belgium.

This small antistatic brush is an indispensable tool for cleaning and manufacturing electronics and products sensitive to static charges. With its ergonomic handle, it fits comfortably in your hand and effectively cleans without causing static damage. The physical properties of the brush include bristles with a height of 17 mm and a width of 33 mm. The handle is made of PVC (polyvinyl chloride) for durability. Technically, this brush is antistatic, meaning it effectively dissipates static charges, making it safe to use with delicate electronic components. With a sleek design in black, this brush measures 17 cm in width, 1 cm in height, and 1 cm in depth, making it easy to store. Whether you're a hobbyist or a professional, this small antistatic brush will be a valuable addition to your tool collection.
